

CHANDRA VAMSI TELUGU

Python Developer | AI/ML | Generative AI | NLP | LangChain | RAG
+91 7780140364 | chandravamsi.t@gmail.com | linkedin.com/in/chandra-vamshi | Hyderabad, India

PROFESSIONAL SUMMARY

AI Developer with 3+ years of experience designing and deploying AI/ML solutions, NLP systems, and LLM-powered applications. Proficient in Python, SQL, Scikit-learn, LangChain, RAG architecture, and ChromaDB vector stores. Hands-on experience in building scalable ML pipelines, predictive models, and generative AI chatbots. Strong understanding of SDLC, Agile methodologies, and collaborative cross-functional delivery. Seeking to contribute Python and AI/ML expertise to Digital Engineering practice.

WORK EXPERIENCE

Envibe Software Pvt Ltd | Python Developer Intern | AI Developer | 07/2023 – Present

Python | REST APIs | SQL | Azure | Machine Learning | Automation

- Developed and deployed Python-based ML pipelines for data ingestion, transformation, and model serving, improving end-to-end processing efficiency by 25%.
- Automated API-based integration workflows using Python and REST APIs, reducing manual workload by 30% and improving delivery speed.
- Wrote optimized Python and SQL scripts for data transformation and query tuning, improving execution performance by 30%.
- Engineered AI-ready structured datasets for ML model training, reducing model preparation and feature engineering time by 25%.
- Built Python automation scripts for scheduled batch workflows and monitoring, cutting manual intervention by 20%.
- Contributed across the full SDLC — from requirements gathering and design to development, testing, deployment, and production monitoring.

PROJECTS

LangChain RAG-Powered FAQ & Support Agent

Tech Stack: Python, LangChain, ChromaDB, RAG, NLP, HuggingFace

- Built an intelligent FAQ chatbot using Python and LangChain, implementing Retrieval-Augmented Generation (RAG) for context-aware responses.
- Integrated ChromaDB as the vector store to index knowledge base documents and perform semantic similarity search for query resolution.
- Developed a document ingestion pipeline using LangChain text splitters and embedding models for semantic chunking and vectorization.
- Implemented RetrievalQA chain with open-source LLMs (HuggingFace) to generate accurate, grounded answers from the knowledge base.
- Improved FAQ response accuracy by 35% over keyword-based systems through vector similarity search and retrieval tuning.
- Analyzed user query patterns to fine-tune chunking strategies and embedding configurations for optimal retrieval precision.

Crypto Analytics – AI Prediction System

Tech Stack: Python, LSTM, TensorFlow, REST APIs, Pandas, Matplotlib

- Collected and preprocessed multi-exchange cryptocurrency data using Python (Pandas, NumPy) for time-series analysis.
 - Engineered time-series and sentiment-based features, improving LSTM model prediction accuracy by 18%.
 - Built and trained LSTM deep learning models achieving 60%+ prediction accuracy for short-term price forecasting.
 - Integrated real-time REST APIs for live data ingestion and automated forecasting pipeline execution.
 - Developed interactive dashboards using Matplotlib and Seaborn for visual analysis and investment decision support.
-

EDUCATION

Bachelor of Technology – Information Technology | 2019 – 2023

Sri Venkateswara College of Engineering, Tirupati | Percentage: 75%

Intermediate (MPC) – Sri Chaitanya Junior College | 2017 – 2019

Percentage: 85%

TECHNICAL SKILLS

Languages: Python, SQL, Flask, Streamlit

Python Libraries: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn

AI / ML: Regression, Classification, Clustering, Ensemble Methods, LSTM, Feature Engineering, Model Evaluation

Generative AI & NLP: LLMs, Prompt Engineering, RAG Architecture, LangChain, ChromaDB, Vector Stores, NLP, Embeddings

Deep Learning: TensorFlow (Basic), PyTorch (Basic)

Cloud & Tools: Azure (Data Factory, Synapse Analytics), REST APIs, Git

Visualization: Matplotlib, Seaborn, Power BI (Exposure)

Methodologies: Agile, SDLC, Cross-functional Collaboration, Problem Solving
